Technical data

BALL SORTING MACHINE KSM 500

The Ball Sorting Machine KSM 500 has been particularly developed as an intermediate link in order to prevent any possible damage to the machines of the subsequently following processing steps. The purpose that is achieved by applying this machine, is that no too small, nor defective, nor too big balls will reach the next processing step.

For the different ball sizes that have been classified and divided up into groups, there are sorting rollers with varying leads of their spiral conveyors available :

sorting range I	ball diam.	3 - 10	mm
sorting range II	ball diam.	8 - 18	mm
sorting range III	ball diam.	15 - 25	mm
sorting range IV	ball diam.	20 - 37.5	mm

Diameter of the sorting rollers :	157 mm
Length of the sorting rollers :	550 mm
Power required :	0.37 kW
Speed of the sorting rollers :	20 - 160 min ⁻¹

Subject to modifications in
design and construction !
